## HIP AND KNEE REPLACEMENT SURGERY PRIORITY CRITERIA TOOL

### PLEASE PRINT CLEARLY

Provincial Health Care Number: \_\_\_\_\_  
 Patient Name: \_\_\_\_\_  
 Patient Age: \_\_\_\_\_ Sex: [circle one] M F  
 [Tick one box] ☐ Left Hip ☐ Right Hip ☐ Left Knee ☐ Right Knee  
 [Tick one box] ☐ Primary ☐ Revision  
 Diagnosis: \_\_\_\_\_  
 Surgeon's Name: \_\_\_\_\_ Phone: \_\_\_\_\_  
 Date: \_\_\_\_\_

*Patients must be on appropriate non-surgical treatment prior to evaluation (e.g. medications, walking aids, shoe inserts)*

*Please check the box that most accurately describes the patient's current situation*

1. Pain on motion (e.g. walking, bending): \*

- ☐ None/mild  
☐ Moderate  
☐ Severe

2. Pain at rest (e.g. while sitting, lying down, or causing sleep disturbance): \*

- ☐ None  
☐ Mild  
☐ Moderate  
☐ Severe

*\* Take into account usual duration, intensity, and frequency of pain, including need for narcotic vs. non-narcotic medication.*

3. Ability to walk without significant pain :

- ☐ Over 5 blocks  
☐ 1-5 blocks  
☐ <1 block  
☐ Household ambulator

4. Other functional limitations (e.g. putting on shoes, managing stairs, sitting to standing, sexual activity, bathing, cooking, recreation or hobbies):

- ☐ No limitations  
☐ Mild limitations - able to do most activities with minor modifications or difficulty  
☐ Moderate limitations - able to do most activities with modification or assistance  
☐ Severe limitations - unable to perform most activities

(PRIOR ART)

FIGURE 1

2 / 19

5. Abnormal findings on physical exam related to affected joint (e.g. deformity, instability, leg length difference, restriction of range of motion on examination):
- ☐ None/mild
  - ☐ Moderate
  - ☐ Severe
6. Potential for progression of disease documented by radiographic findings (e.g. recurrent dislocation, x-ray evidence of protrusion, significant bone loss, component wear, impending fracture):\*\*
- ☐ None
  - ☐ Mild
  - ☐ Moderate
  - ☐ Severe
- \*\* Predominantly applies to revisions, use in primary cases only in special circumstances (e.g. ligament instability, bone loss)
7. Threat to patient role and independence in society (i.e. ability to work, give care to dependants, live independently (difficulty must be related to affected joint)):
- ☐ Not threatened but more difficult
  - ☐ Threatened but not immediately
  - ☐ Immediately threatened or unable
8. All things considered, how would you rate the urgency or relative priority of this patient?  
(Draw a line across the scale.)

Not Urgent at all

Extremely Urgent  
(just short of an emergency)

9. In your clinical judgement what should be the maximum waiting time for this patient?  
Number of weeks \_\_\_\_\_ OR Number of months \_\_\_\_\_
10. In your practice how long would it take this patient to have surgery done from the time you first see the patient?  
Number of days \_\_\_\_\_ OR Number of weeks \_\_\_\_\_ OR Number of months \_\_\_\_\_
- Please record any comments on the form, criteria or process: \_\_\_\_\_
- \_\_\_\_\_
- \_\_\_\_\_
- \_\_\_\_\_
- \_\_\_\_\_

(PRIOR ART)
